75 S. Frontage Road
Vail, CO 81657

IN NOVEMBER 2016, Eagle County residents voted to pass a Bond, providing critical financial resources for Eagle County Schools. The Bond enables significant facility upgrades to ensure our community schools meet the needs of our growing student population.

As part of those projects, Red Sandstone Elementary will go through significant renovations. These renovations include but are not limited to:

- A much needed cafeteria will be added
- Classroom space will increased
- Library/media center will be enhanced
- Professional development space will be developed
- Technology will be enhanced
- Windows will be replaced
- New flooring and paint
- New furniture
- Asphalt repair and maintenance
- Many other deferred maintenance issues

These renovations address programming and maintenance issues. The addition and renovation will free up square footage in the building footprint for the existing number of classrooms to grow to a higher student square footage ratio that meet the current Eagle county School District standards. The existing building programmatic spaces will be rearranged to allow for maximizing square footage within each space. Therefore, there is not a need to increase capacity for student enrollment. Staffing at the school will not increase.

Thank you sincerely,

Sandy Mutchler
Chief Operating Officer
Eagle County Schools
