

MEMORANDUM

To: Jonathan Spence From: Tom Braun

CC: Doris Kirchner, Jim Wear, Chris Knight

Date: August 30, 2017

RE: East Wing/Updated Employee Generation Calculations

The 2015 VVMC/TOV Development Agreement (DA) establishes that as a part of the CUP review of the East Wing the employee generation estimates for the East Wing that were provided in 2015 be updated. The purpose of this memo and attached info is to provide this update. In addition to this memo the following information is provided:

- 8/19/17 Updated EW Employee Housing Estimates
- East Wing Floor Plans highlighting employee generating SF

Background

As stipulated in the DA, prior to issuance of a building permit for the West Wing VVMC provided employee housing mitigation for the entire Master Plan expansion. Mitigation was based on 56 new employees from the West Wing and an estimate of 34.2 employees for the East Wing, or a total of 90.2 new employees. Mitigation was provided by payment of cash-in-lieu based on 20% of new employees, or 18.04 employees at \$74,481 per employee.

Approach to Updating Employee Generation

The estimate of 34.2 employees from the East Wing was made based on what was known about the East Wing in 2015. East Wing plans have evolved considerably since that time. The approach to reconciling or updating employee housing generation from the East Wing is simply to re-calculate employee generation based on current plans using the same assumptions used in the 2015 report. These assumptions include:

- Utilize employee generation rates for uses as established the PEC's review of the West Wing,
- As established in the 2015 employee generation report, based on "decompression", assume no new employee generation for the new Emergency Department, and
- As established in the 2015 employee generation report, provide no new employees for square footage devoted to the enclosed loading facility, the new central utility plant and the ambulance storage/patient drop-off areas, and
- As was done in the 2015 report, deduct the estimate of employees in the existing East Wing (44.4) from the total new employee generation from the proposed East Wing (to reflect existing SF to be demolished).

The difference between the 2015 estimate of 34.2 employees and the employee generation based on proposed plans for the East Wing will be the new employee generation for which VVMC will mitigate as per the Town's Commercial Linkage ordinance.

Summary of East Wing Housing Requirements

The 8-30-17 VVMC East Wing Employee Housing spreadsheet outlines uses, square foot and employee generation for the existing East Wing, the 2015 concept plans for the East Wing and the 2017 proposed plans for the East Wing. Floor plans depicting employee generating square footage are also provided. In summary, employee generation for the proposed East Wing includes:

- 104.3 New employees from proposed East Wing
- 44.4 Employees estimated for the existing East Wing
- 59.9 Net new employees for East Wing (after deducting employees generated by the existing East Wing)

59.9 new employees from the East Wing and the 56 employees generated by the West Wing total 115.9 employees from VVMCs Master Plan expansion. 92.2 employees were mitigate by VVMC in 2015. The number of new employees to be mitigated is 25.7. Commercial Linkage regulations requires mitigation for 20% of new employees, or 5.14 employees.

Proposed Housing Mitigation

VVMC will provide mitigation for the 5.14 employees by purchasing and deed restricting dwelling units located within the Town of Vail. In accordance with town regulations, this will occur prior to issuance of occupancy permits for the East Wing.
